### Baseboard "Screw Less" Cable Clips

Model SI-0991 ( Patent Pending )

Senior baseboard "Screw Less" cable clips have been specifically designed to facilitate and enhance the installation of indoor telephone cable at the subscriber's home.

Senior SI-0991 cable clips easily slip behind baseboards to firmly secure the telephone cable along walls and carpet. They avoid crushing or nicking of the telephone cable commonly caused by conventional cable clips with screws, nails, or staples.

#### Senior SI-0991 Series features:

- Clips are made of quality steel with a high impact baked enamel paint
- Clips come available with two barbs for a more permanent installation or they can be easily flattened allowing clips to be removed and reused
- Clips are available for indoor telephone cable in black, white or ivory color
- Ensure proper installation every time

#### Installation Instructions:

1. Mount clip on indoor telephone cable
2. Position clip and telephone cable flush to wall or carpet surface
3. Press firmly with thumb to pierce any paint and slide clip behind baseboard
4. Space clips properly to secure telephone cable uniformly along walls and carpet

#### Ordering information:

SI-0991-B Clips "Screw Less" , Black	SI-0991-N Clips "Screw Less" , Ivory
SI-0991-W Clips "Screw Less" , White
